Carpets for
KIDS®
etc...
When Quality Counts!

**Carpets for Kids® cares
for the Environment!**

Carpets For Kids® helps keep our planet green by reducing landfill waste. We send our unused production scraps and damaged goods from our facility to a nearby recycling center. Annually, we recycle an average of **230,000 pounds or 115 tons** worth of material. In addition, Carpets for Kids® pays a premium to process this material for recycling and will continue to be committed in fulfilling our environmental objectives.

Carpets for Kids® uses renewable power from PGE: Green Source. 100% of our monthly usage in our corporate office is offset with renewable resources. Our power comes from approximately 50% new wind, 40% geothermal and 10% biomass (wood waste) power.

All Carpets for Kids® catalogs are printed on environmentally responsible paper. Our paper comes from well-managed forests, controlled sources and recycled wood or fiber; and is approved by the Forest Stewardship Council.

All Carpets for Kids® catalogs use 100% Soy ink. As opposed to traditional petroleum-based ink, soy-based ink is more environmentally friendly. It also is available in brighter colors, improves the life span of the printers, makes it easier to recycle paper, and is more economic in the long run.

How can you stop landfill waste? It's easy; all of our carpets are recyclable! Just roll up your old CFK carpet, locate your nearest recycling center on our website, and ship.
