

# SOFT BABY BLOCKS

These four soft blocks are lightweight, multi-textured, and brightly colored with a variety of stimulating sounds.

Your baby will find them easy to grasp, shake, stack, or simply hold in his hands.

## DEVELOPMENTAL AREAS

Language Development

Sensory Development

Cognitive Development

Fine Motor Development

Perceptual Development

### BUILDING FUN

Pile the blocks on top of one another and watch your baby knock them down with a simple swipe. Do it again and again for lots and lots of giggles.

### ANIMAL WORLD

Use the blocks to introduce your baby to animals. Point to the animals on the block, name them and add a sound. Laugh along with your baby as you make animal sounds together.

### JINGLE, CRINKLE

Watch your baby explore sounds as she grasps and shakes each block. Which block jingles? Which block makes a crinkly sound? Did you hear a squeak?

### VISUAL TRACKING

Hold one of the blocks in front of your baby and slowly move it back and forth and watch as your baby tracks the block with her eyes. Your baby can also do this holding a block as she is playing on her back.
