

PEGBOARD SET

Perfect for young hands and minds, the 8" square Lauri crepe rubber pegboard has 25 holes so kids can make lots of designs. They will love to see how high they can stack the pegs.

DEVELOPMENTAL AREAS

Language Development

Cognitive Development

Fine Motor Development

STACK TIME

Stack the pegs on top of each other and see how tall you can build them. Help your toddler stack the pegs as tall as he is. Can you keep going? How tall can you stack using only one color? How about two colors?

STEM FUN

Use your imagination and the pegs to design and create a maze. With your toddler, "walk" your fingers through the maze from beginning to end. Try using a small car and drive the car through the maze.

PATTERNS

Use the different colors of pegs to make patterns. Start with two colors, then three, next try four, and finally five colors. How many different patterns can you both make?

PEG COUNT

Take turns with your toddler and count out loud as you each place a peg on the board. The first time you try, stop at 10 and then slowly keep adding pegs until you can count all the way to 25.
